

## KOHLER® AND SDMO®: OUR STORY

A global force in power solutions since 1920, Kohler is committed to reliable, intelligent products, advanced engineering and responsive after-sale support.

And you can find us on nearly every continent on the planet. Over the years, we've amplified our global reach—acquiring SDMO Industries, a worldwide leader known for its premium range of generator sets. Together, we've built on the legacy of two leading brands to create one of the largest generator manufacturers in the world—and continued an unwavering focus on reliable power systems and innovation.

Our R&D, manufacturing, sales, service and distribution facilities span the globe from Kohler, Wisconsin, to Brest, France. And while we've maintained two world-renowned brand names, today KOHLER and SDMO operate as an integrated global organization that's leading the way in design and manufacturing.

We deliver integrated industrial power systems for emergency, prime and continuous applications worldwide—from hotels and hospitals to water treatment facilities and government offices. With a deep understanding of your industry, we excel in designing customized power systems that simplify your most complex challenges.

#### **ALL-IN-ONE ENTERTAINMENT**

With stadiums or theme parks at the center, many new entertainment complexes are offering guests everything they need in one location. They can catch a game, relax at a spa, enjoy a high-end meal and rest in their hotel room—all on the same property or complex. This approach raises the stakes for backup power.

#### **HIGH-TECH HOTELS**

Rising affluence has led to more travelers from around the world. Whether they're traveling for business or leisure, these guests expect fast, reliable Wi-Fi, digital reservation systems, mobile check-in, mobile concierge services and more. Those attending business meetings also expect hotels and conference centers to have high-quality tech equipment.

#### A NEW TYPE OF CASINO

To attract new customers, casinos are developing different types of games including fantasy sports, eSports and online wagering. These new games all require a significant amount of data and constant connectivity. And whether they're playing these new games or the classics, guests expect their financial information to be secure.

### Keep your power on—even when the power's out.

Kohler makes it easy. From planning to postinstallation, our team will take care of you every step of the way—with a power solution customized to your needs.

## **ASSESSING FACILITY NEEDS**

Today's critical power needs go far beyond keeping the lights on. Whether they're traveling for work or visiting an amusement park, people expect a safe, hassle-free experience. And that means features we once thought of as extras, such as Wi-Fi and big-screen TVs, need to be online 24/7 to keep guests satisfied and earn the positive reviews your business depends on.

#### **SAFETY**

The safety of your guests is of the utmost importance—especially if you're operating a theme park where a power outage could leave guests stranded on a ride. Hotels, casinos, stadiums and other entertainment complexes must make safety a priority as well, ensuring fire warning systems, water sprinklers and other safety equipment work during a power outage.

#### **LOCATION & SOUND**

Generators must meet NFPA, UL, electrical and state building codes and ensure that placement meets all space requirements for maintenance and safety. In addition, generators must meet any local noise ordinances.

#### **EMISSIONS**

Standby and prime application emissions standards vary around the globe including requirements for EPA Tier, EU and China Stage, India CPCB and many other regional equivalencies. In addition, local certifications such as CARB or AQMD in the U.S. need to be considered.

#### **BEYOND BACKUP POWER**

Many hotels and other facilities use generators to supplement their power capacity for special events including outdoor weddings, political conferences and large receptions.

## **POWER CONSIDERATIONS**

Each hospitality facility must be ready to operate without power in the case of threatening weather, weakness in the power grid or even construction accidents. Yet each has unique power needs based on its design, size and the loads it needs to carry. All of these considerations can lead to a customized solution.

#### **TOTAL SYSTEM INTEGRATION**

Every detail down to the last bolt. This isn't your typical power system. It's a KOHLER® industrial power system—which means it's designed and manufactured with KOHLER components—including generators, transfer switches, paralleling switchgear and controllers. But the best part? We customize every power system to your specs. So no matter how large or complex your job, everything will work together seamlessly.

#### **UPTIME AND RELIABILITY**

Backup systems must start quickly and reliably. In addition, a generator must maximize uptime and minimize operating costs. Paralleling multiple redundant generators ensures 100% uptime even when one or two units are down.

#### **PERFORMANCE**

A reliable power system plays a major role in helping hospitality facilities ensure the safety and satisfaction of their guests. Generator sets should start providing backup power within seconds of a break in utility power supply, and transfer switches should provide seamless automatic switching between the electrical power from the utility and the backup power system.

#### **KOHLER Generator Sets**

- Generators meet tough industry testing and quality standards
- PMG alternators provide advanced short-circuit capabilities
- Diesel generators feature superior load factor, reliability and availability, and they offer one-step load acceptance

#### **KOHLER Automatic Transfer Switches (ATS)**

- Built and tested in Kohler, Wisconsin
- Part of a fully integrated solution
- Includes standard, bypass-isolation and service-entrance configurations
- CSA and IBC certification available

#### **KOHLER Switchgear**

- Built and tested in Kohler, Wisconsin
- Part of a fully integrated solution
- Simple and complex solutions available

- 1 KOHLER<sub>®</sub> GENERATOR Gas generators 25–1300 kW Diesel generators 10–4000 kW
- 2 KOHLER AUTOMATIC TRANSFER SWITCH

Open, closed and programmed transition operating modes; standard, bypass-isolation and service-entrance switch configurations

3 KOHLER REMOTE ANNUNCIATOR

Remote monitoring and testing of transfer switches

4 KOHLER PARALLELING SWITCHGEAR

Low and medium voltage

5 KOHLER DECISION-MAKER® CONTROLLER

Control, monitor and system diagnostics

**6** KOHLER WIRELESS MONITOR

Performance monitoring around the clock

**7** KOHLER MONITORING SOFTWARE

Monitors generators and transfer switches from a PC

## THE KOHLER® DIFFERENCE

# **TOTAL SYSTEM INTEGRATION**

As a single-source provider, you can be confident that every power system is loaded with designed and manufactured components from Kohler. TOTAL SYSTEM INTEGRATION assures you that no matter how large or complex the project, everything works together seamlessly–from generators and transfer switches to paralleling switchgear and controllers. That's the KOHLER difference.

#### **End-to-End Management**

From planning the design and selecting the equipment to testing and commissioning, we're focused on delivering reliable, custom-designed power systems tailored to your specifications. Agile manufacturing, rigorous testing and careful commissioning assure you of a solution that fits your business—and your budget.

#### **Customized Solutions**

Your KOHLER/SDMO® power system is customized, built and tested by a dedicated team of experienced applications engineers. They've designed power systems for hundreds of data centers and combine industry experience with Kohler's agile manufacturing process to deliver your purpose-built solution.

#### **Local Service:**

#### **Nationwide or Around the World**

A single call assures you of expert support and problem resolution day or night. Kohler's worldwide dealer and distributor network has access to complete inventories of KOHLER genuine parts and provides factory-trained service technicians who are fully vetted and thoroughly tested.
